ARG

Serving the Global Aftermarket with OEM Equivalent Glass

Fuyao produces its ARG Glass on the same lines as OEM glass and conforms to the same strict procedures and quality control systems to ensure that your glass will fit right, perform as required, and look as good as new.

Your Expert in Automotive Glass Aftermarket

We serve the global auto glass wholesalers and installers with over 30,000 replacement parts, expanding the catalogue with more than 2,000 new products each year.

We are dedicated to our position as manufacturer, continuing to share common destiny with global supply chain partners and strengthening core values to drive the growth of our supply chain partners. We are striving to win more business opportunities for our global customers.

Product Technology

Full range supply of automotive glass including Windshield, Backlite, Door Glass, Quarterlight Fixed ASM and Sunroof.

Innovative Design

With over 1,000 auto glass issued patents, Fuyao is dedicated to ongoing research and development, leading the technology of future.

Quality

Accredited Quality Assurance System

Quality Mangement System

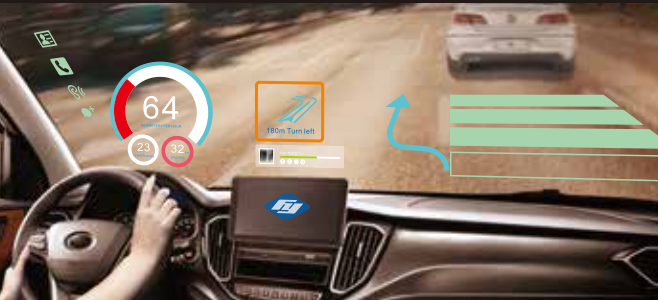

- ISO14001
- IATF16949
- OHSAS18001

Quality Certification

- CCC -China
- DOT - North America
- ECE – Europe
- GOST - Russia
- AS/NZS - Australia /New Zealand
- INMETRO - Brazil
- JIS - Japan
- KS - Korea
- SABS - South Africa
- SNI - Indonesia

Head-up Display Glass

- Lowers frequency of checking dashboard
- Focus on driving and quick response times
- Improves safety and visual comfort

IR Coated Reflective Glass

- Reflects over 65% IR to effectively insulate from heat
- Reduces AC usage to lower fuel consumption by 3%-5%
- Better anti-glare functionality making night driving safer
- Maintenance-free during lifespan

Acoustic Glass

- Acoustic PVB can greatly reduce cabin noise
- Break-resistant
- Thinner glass has the same acoustic performance as thicker glass

Heated Glass

- Wire heated glass and coated heated glass
- Quick defrost, defog and de-ice to offer clearer visibility
- Selected heating of wiper , rain sensor and camera zone

Hydrophobic Glass

- Clear view driving on rainy days
- Easy to remove contaminants that impede vision

Semi-tempered Laminated Glass

- Anti-theft and shock resistance
- Reduces the potential for injury should glass be broken

Panoramic Sunroof

- Super wide vision allowing enjoyments of the full view above
- Good exposure to sunlight and excellent air exchange

Encapsulation Glass

- Injection encapsulation, PU-extrusion encapsulation and bonding encapsulation
- High assembly efficiency and good sealing performance as well as anti-noise, dust and vibration

Photovoltaic Sunroof

- Converts solar energy to electricity to power the in-car electrical system
- Energy saving and emission reduction

Variant Transmittance

- PDLC Dimming glass and Electrochromic glass
- Adjusts the light transmittance to suit your comfort and protects your privacy

Fuyao Supplies Windshield for Vehicles that Carry Advanced Driver-Assistance Systems (ADAS) Functions

Mercedes-Benz

Honda Accord

The camera must be recalibrated after an ADAS windshield is replaced to ensure safety. Every car manufacturer has its own specifications for ADAS calibration. These differences range from manufacturer to manufacturer, and in many instances, the same manufacturer will have differences from model to model.

Therefore, only trusted manufacturers, who have the proven experience, can produce the original specifications of auto glazing which enables the ADAS system to be recalibrated. Precise calibration ensures correct Pitch, Yaw and Roll of camera angle. Fuyao Group is proud to be one of them and windshields produced by Fuyao are easy to be calibrated.
